KNOWING YOU

Every year 500,000 Americans find out they have diabetes.

Support from family and friends softens the news and with proper care, diabetes can be controlled.

And life can go on.

Untreated, diabetes can lead to heart disease, kidney disease, and blindness.

Diabetes can also result in early death.

Are you experiencing blurred vision, numbness in feet or fingers, or frequent skin infections? Are you over forty and overweight? Is there a history of diabetes in your family?

See your doctor.

Because what you don't know can hurt you.

Have you had your furnace ducts cleaned and sanitized in the last 2 years?

If not, you need to, because your ducts are inhabited by dustmites—whose airborne eggs, feces and carcasses are contaminating the air that you breathe.

Dustmites' fecal pellets are 5 microns in size and cause allergic reactions when they're breathed in.
 Pacific Northwest, with its moist and mild climate, is a top mite-breeding location in the world.
